GOVERNMENT COSTLY
IN CANADA

According to a recent statement issued by the Citizens' Research Institute of Canada, the total expenditure on current accounts of all government in Canada, Dominion and provincial, in 1936 amounted to \$1,010,731,922. This means \$97.10 for each man, woman and child in the country, equal to 24.4 of the national income.

These figures support the contention of the majority of the Canadian people that our government is costing far too much.

It is the opinion of many that one parliament would serve the three western provinces better, which would greatly reduce the cost. But where should the capital be located? There's the rub.

The moment that this or that place was mentioned as the centre the fat would be in the fire, and thus writing it looks as though, so far as the public is concerned, we are concerned, we will continue as we are.

If the population of Canada were three or four times larger than it is, what would be the cost per capita would be just that much less.

It is not the intention of this article to go into the details of the various royal commissions and other incidents which run into the hundreds of thousands and result in no benefit to the public except the squandering of money. We merely hand on the above figures to our readers to ponder over and come to their own conclusions.

Along the Trail

By J. B. YULE

HEALTHY BODIES NECESSARY AS SOLID FOUNDATION TO NATION

When the physique of a race falls below a certain level, history records that such a race perishes or passes off the scene as a unit.

Praying by the experience of the past and using our dimmest modern ideas, which has become rooted, is to take the boys and girls and develop them physically as well as morally.

It was my privilege to spend most of the day of May 28 at the schools' track meet held at Grande Prairie.

To the writer, who has always believed in developing the youth physically, the meet was inspiring. Here were boys and girls, bright-eyed and clean-limbed, assembled to compete in a well-thought-out program of sports.

Under normal conditions, assuming that children are rightly clothed and housed, with few exceptions, there is no reason, if athletics and games and sports are concerned, why there should be any hollow-chested weaklings among young Canadians.

Today, when athletics were more or less frowned upon by the powers-that-be, today various forms of organized sports are considered just as important to the complete studies as mathematics. This is a marked advance in the training of youth.

As I watched the boys and girls do each their utmost to win, but if they lost never grumbled or complained, I said to myself: "This is the proper way to lay the foundation of a country."

As one who is considerably over the middle century, I have seen plenty of battles in this game of life, I have found that the greatest asset that a boy or girl can possess is a healthy body.

In this new order of things, the school teachers have a most important part to play. By bringing by splendid discipline of their pupils at the recent meet, they can be depended upon to play that part efficiently.

PREPARED FOR ANY EMERGENCY

While sitting "Along The Trail" I picked up the following item from the gusts of wind.

A doctor from a city in Pennsylvania, was engaged recently at Chicago recently. Having been told that Chicago was a "tough town," he took his chances and went there armed with a rifle.

It so happens that the doctor looks after the health of that wing of law and order known as the police and for a month previous to his visit to "Windy City" engaged in strenuous tract practice and took special lessons on the latest method "on the draw."

With the doctor it was a case of "to be forewarned is to be forearmed." He had his gun charged and went armed and well prepared.

It is stated that not once did he venture out without his trusty "gat" on his person and at night trusts "gat" to his pillow and under his pillow.

"Chicago," he kept repeating to himself, "is full of racketeers and all the rest of it, and I am prepared for any emergency."

The doctor has since returned to his home city, but the dispatches do not say whether he arrived home disappointed in not meeting with a thriving experience during which he engaged in sun-pile practice.

The writer, however, says that so jittery was the doctor, now and again he would whip out his revolver at opportune times to keep in practice "on the draw," much

THE SANDWICH MAN—Arizona Republic

to the discomfort of his fellow workers.

Having lived in Chicago for ten years, the story is of intense interest to the writer.

Dad's Notions

By E. S. Stanley

Though there are those who will object to an immigration policy for Canada, our honored member for Peace River at Ottawa is of the same favorable opinion. And it is my opinion that every day of delay adds to the cost.

It is the opinion of many that one parliament would serve the three western provinces better, which would greatly reduce the cost. But where should the capital be located? There's the rub.

The moment that this or that place was mentioned as the centre the fat would be in the fire, and thus writing it looks as though, so far as the public is concerned, we are concerned, we will continue as we are.

If the population of Canada were three or four times larger than it is, what would be the cost per capita?

It is the opinion of the various royal commissions and other incidents which run into the hundreds of thousands and result in no benefit to the public except the squandering of money. We merely hand on the above figures to our readers to ponder over and come to their own conclusions.

PASTEURIZATION OF MILK AND HEALTH

By I. V. Macklin

I have always had a profound respect for nature. Through countries and continents by trial and error approached her to perfection in the production, for example, of suitable foods that man has done. I have always believed that raw milk for raw milk for young or old. But with the ever widening use of pasteurized milk the adherence to this idea has been shaken.

Timely Hints From the Beaverlodge Sub-Station

By W. D. Albright
"IT IS A PLEASURE AS WELL AS A DUTY TO SERVE"

Farming is no child's play.

It is always too soon to despair.

An earth auger employed to make moisture soundings would explain many a riddle in crop production.

No individual nor any nation ever made himself nor itself rich by spending for luxuries. Honest wealth can be accumulated only by saving and sound investment, i.e., by production and thrift.

Unless one has learned how to apply knowledge at hand he is handicapped in connection with his business, at home or abroad, who can credit the manure to the live stock.

At Beaverlodge the showing of bloom is the best for years. One Manitoba will produce more bloom of bloom to the tips and has set fruit prodigiously. Many apples and cran-

berries have bloomed and the saskatoon hedge had the bravest showing ever.

Lakad alfalfa is giving a good account of itself in the area of Beaverlodge, in Montana and other regions where one cut per annum is favored practice. Even here two cuts are taken, even with wild grasses and sometimes exceeds it.

Eleven degrees of frost at Morden on the morning of May 12 caused unseasonable in the minds of horticulturists, but the fact is that due to the seed and fruit crops that is widely apparent in the climate, some of the trees are still green while others are parched. Siberian, Manchurian and Scotch apricots are swelling their fruit in promise now.

Cultivators have learned how to apply knowledge at hand he is handicapped in connection with his business, at home or abroad, who can credit the manure to the live stock.

What is Canada's Greatest Co-operative Business?

Answer.—Life Insurance—in which more than 3,500,000 Canadians are united for mutual protection.

Question.—Then, about one in three every three Canadians owns Life Insurance?

Answer.—Yes, and more than half the population of our country benefits directly from Life Insurance.

Q.—How?

A.—Because Life Insurance savings not only protect policyholders but also guarantee financial security to the women and children who are their dependents.

Q.—How much money does Life Insurance pay out each year?

A.—Approximately \$150,000,000—or, at the average rate of Half-a-Million Dollars every working day.

Q.—How does Life Insurance invest the millions of dollars of policyholders' savings?

A.—In many worth-while enterprises for the benefit of all Canadian people.

Q.—What are the principal investments?

A.—Government bonds—municipal debentures—first mortgages on homes and farms—and other investments authorized by law.

Q.—How do these Life Insurance investments benefit Canada?

A.—They help to build homes, schools and good roads—improve farm property—extend transportation systems—finance industries—and construct local improvements.

This is the eighth of a series of messages sponsored by Life Insurance Companies operating in Canada. The ninth, to appear in two weeks' time, will discuss why Life Insurance is so safe.

inches. There were fairly good crops that year in spite of the fact that some early snow grain showed several successive stages of germination. The mean temperature of the month did not agree above normal. The highest reading was 81.2° on 24th; the lowest, 29.2° on 1st. The highest temperature half a mile east it was 13° on the latter date. Sunshine was 23.33 hours more than the normal 18.6 hours average. Wind totalled 8.000 miles, the heaviest blow being 47 miles per hour on the 12th.

Faile Wild Oats

Since the item "Wild Oat Crosses" appeared in a recent issue of *The Northern Tribune*, the results of investigations conducted at the University of Alberta have concluded that false wild oats arise as a "sport" from cultivated wheat. The University experiments demonstrated that natural crosses between wild and cultivated oats are common between the two forms found growing side by side. The intermediate types which Mr. Lewis referred to in his article are the result of one or more of the characteristics of either parent and most of them in turn produced intermediate types. It is probable there will be a great number of so-called types. Some of them will be true wild oats, others will be characteristics of wild oats. Their presence in seeds reduces its value. —E.C.S.

Cutworms

"Your Time is Short" rather slipped up in failing to warn us of this cutworm plague," remarked a friendly reader recently.

Admittedly we were really more concerned about grasshoppers, though it must be admitted that last year, though not less abundant, the conditions had been very favorable for multiplication of cutworms. In fact, the year 1937 gave the insects a chance to pupate in large numbers, probably in the soil, from June 15th to August and September to hatch into worms this spring. The weather in the meantime has been favorable for hatching and feeding, hence the number of cutworms in certain spots is increasing.

Sweet clover stands appear to be very attractive to the red-backed cutworm, and the patches of clover have been eaten till the spot is grey. On one square foot of ground, 100 cutworms may be found, while when the caterpillars look like worms they may be 1000. E. W. Hart, Division of Horticulture, Central Experimental Farm, Ottawa.

Other instances of the misapplication of the name of rose in English and French are to be found in the names of students, who aver that the word is derived from an original meaning "bulb," which is what the flower resembles, of which there are many kinds in Palestine, one of which may be the plant referred to.

That the Romans were familiar with roses and dianthus is shown by the expression "sub rosa," common to this day. It refers to the practice of robbing over the door of a public or private building as a warning that whoever passes through it will be liable to punishment if he is seen to do or say within. The Romans probably borrowed this custom from the Greeks, who called the rose "Harpocrates," the god of silence. The Latin "sub rosa" would mean "under the rose," in the modern progressive vernacular as "Mum's the word."

Canadian wild roses, of various kinds, grow from coast to coast, many of which appear closely to resemble, if not exactly, the rose. Some of them are welcome items in the general flora, while others are pests characteristic of that season.

In this connection, we refer to the cultivators' roads to their wild prototypes, as they have been grown, crooked and eccentric, in many cases. The magnificent forms of today are a noble and lasting tribute to the skill of those gardeners who have developed them from the petals from stamens.

But planting must pass over redoubtless to the birth of the variegated—into another phase of high summer. The roses seem to go crazy when the song of wild birds is hushed; and the gardener, who pauses in anticipation of the Crown of Thorns, may well wonder whether it is wise to hear particulars from readers who may have tried spraying poison bait or the dust-fumigation means of control.

On the other hand, there were made to protect some sweet clover plots by spraying the tops with arsenic, which did not stop the cutworms from eating the roots. When the caterpillars were put into a bottle set in a warm windless place, they were found to be living life was disconcerting. After a week's time no cutworm corpora have been found in the field, though the areas, though that is not saying no, areas have occurred. Arsenic is a low-grade poison, and it is difficult to hear particulars from readers who may have tried spraying poison bait or the dust-fumigation means of control.

To discourage the egg-laying moth, the cutworm, the cutworm is troublesome in the southern part of Alberta, it is strongly advised to keep the hedges clean. If the cutworm is at all possible during the egg-laying season, attempts being made to have a hedge or a bank of wild cultivation prior to that period.

To repeat, the red-backed cutworm species, introduced in the North Strickland stresses clean till. If the surface is the wild vegetation, it is flying about in late summer seeking a place in which to lay her eggs instead of hedges to climb upon. In which some vegetation is growing, as if to assure a food supply for her sprouting caterpillars. Sweet clover and weedy sunflowers provide such conditions, hence those are the areas where the cutworms are in the following year. There are, however, hundreds of species of cutworms, and they are considered in their instincts.

THE NORTHERN TRIBUNE

NEW JUDGE

The first woman to be appointed a federal judge in Southern New York State may be Susan Brandis, daughter of the Supreme Court Justice Louis D. Brandeis.

BEST WHEAT SURPLUS

According to the latest estimate by the Australian government, the Australian wheat crop totalled 180,515,000 bushels.

Australian wheat brought comparatively lower prices in world markets

in the fall of 1937, due to heavy shipments and to the abundance

of white wheat in the world.

PIESTONE CREEK

WHISTLE WHILE YOU WAIT
PIESTONE CREEK, June 7.—There have been dozens of complaints in addition to Huallen's correspondence about the apparently false predictions of the Indian medicine man. It must be remembered that to an Indian, especially a prairie Indian, no object—Pretty soon rain, the sun, moon, etc.—is a week or two instead of a few days. Almost everyone these days is wondering if a theoretical student is like a very good money-lender. They both study the profits (prophets).

NEW GAME SUGGESTED

During the war, Frank Albright was waiting for something better or worse to turn up, the boys used to have immense fun, and at the same time improve the living quarters of the settlers that should be warming up—and see how many cutworms you can get before they eat up your embryo vegetables. This is just as good as sitting with roaches or picking the lice out of your shirt.

Picking water to the garden, but just that desire to make a better show than the neighbors is forcing many to water a few rows at night, and it is quite fun to see what a difference it makes.

REGENTS BEING PARISIMOUS
A notable visitor who belongs to the church was yesterday waiting to let him know he had given twenty-five cents to a priest to pray for rain. Just at the moment a heavy shower came down and lasted only one minute. "Gee!" said the visitor, "I wish I'd made it a dollar."

TIME HINTS

Dear Pipestone Creek: I have read with interest your predictions about the weather. It is getting a little dry here, but what should we worry?—there are no ditches here yet. Can you please tell me why flies cannot see in the winter?

Dear Sir: Your letter has been referred to Professor Blank of our insect department. He states: "There appears to be doubt that the vision of the housefly is lost in winter or comes to a standstill during the winter months. This is entirely due to the fact that flies lose their specs behind them in the summer."

Dear Pipestone Creek: My husband

Announcement**TO THE RESIDENTS OF BEAVER LODGE AND DISTRICT**

I wish to announce that I am opening in Beaver Lodge a first class Meat Market, fully equipped with electrical refrigerator and frigidaire counter. I invite you to visit the new shop and to see the stock of choice, fresh and cured meats, fish and poultry that is handled in this way for your health and protection. Also good variety of fresh fruit and vegetables in season.

ON THURSDAY, JUNE 15TH at 8 a.m. this store will be open for customers and during the first three days with every one dollar purchase a chance will be given on a Western-style Cutlery Carving Set.

The draw will take place at the shop Saturday night at 8 p.m.

"THE STORE WHERE YOU GET SERVICE WITH A SMILE"

Beaver Lodge Meat Market

NICK NASEDKIN, Proprietor

and I are wishing we had never left the Peace River country. After the effects last month we left for England and have spent a considerable time at sea. Every time the ocean rolls we both get a desperately sickly feeling and find it very difficult to retain even the simplest meals. Can you explain this phenomenon? J.D.

Answer: The fact that you had a short time at sea would naturally make you feel up with life generally. Your complaint, however, appears to be Expectora-
toria, a common seasickness that appears to be letting up. An old-timer here today jokingly stated that one has almost got to be a mason to get on the job. *

BUSINESS AS USUAL

With the approaching rainy season obviously very close, many are wondering what the coming year will bring.

This life-giving music the Vagabonds provide certainly cheers one up enormously. There is no question about the fact that it pays to get out and forget those troubles for one night.

SCENIC HEIGHTS**VAGABONDS ATTRACT A GOOD CROWD FRIDAY EVENING**

SCENIC HEIGHTS, June 7.—Despite the fact that a dance was being staged at Elbow Glace and Buffalo Gap on Saturday, the crowd on Friday evening, to trip the light fantastic to the strains of the popular "Vagabonds." This orchestra was invited upon the stage in a most brilliant and dancing was conducted without delay. The floor was in excellent condition, which permitted the girls to give full rein to their surface with the greatest of ease.

The "Vagabonds" were in top form and the entire crowd on their last most of the evening.

During the lunch intermission, Mr. Johnny Bedus favored a with dancing was then resumed to bring a close to a delightful evening.

DISTRICT CROPS NEEDING RAIN

Crops are away to a nice start in this district, but like so many other parts, are in need of rain.

SPORTS NEWS

Scenic Heights softball torsers entertained Lake Saskatoon players on their own diamond last Monday evening. The result in favor of the score was 21-16 in favor of Lake Saskatoon.

Another game between Bear Lake and Scenic Heights, scheduled for Wednesday evening, was turned into a practice, when the boys from Bear Lake failed to put in an appearance.

Scenic Heights' local diamond will be Monday night (June 6) when a team from Buffalo Lakes will enter.

Scenic Heights have two wins against the Buffalo Lakes team, though by a comparatively small margin. *

MAY FIELD GIRLS' SOFTBALL TEAM

Scenic Heights sports fans may soon boast of a girl's softball team, which will be organized in the near future. For customers starts today (Tuesday) and will continue on this day, every week until further notice. The number of cream shippers has doubled over last year.

VALUABLE MILK STOCK POISONED

Amongst those who might have been affected is Mr. Lester Van Schaick, who recently had the misfortune to lose two cows. It is believed that the animals ate wild lupine. Another animal, also allegedly affected was saved by bleeding.

WAPITI SWIMMING SEASON HAS STARTED

The wisked old Wapiti is now going down very rapidly and, although not warming up quite so quickly, will, in the opinion of the local lifeguards, be the local club, B.C., by Sunday next. It is anticipated that there will be a good turn-out to take the initial plunge on Sunday afternoon. *

NEW CUSTOMERS ARRIVING

This time the stock has been re-supplied with the latest news of new arrivals. Aberdeen Angus ranchers of Stony Meadow, are receiving the congratulations of their many friends. The local club, Ryerson, also received the store's standard present on such occasions—a tin of Johnson's baby powder.

Lectures On China Being Given By Missionary

Rev. John Kitchen, Missionary From China, Is Giving Addresses At Points In G. P. Presbyteries

Rev. John Kitchen, a returned missionary from China, is speaking at several points in Grande Prairie Presbytery and next Sunday, June 12, will address meetings at Red Rock, where he will speak at 11 a.m.; Lake Saskatchewan Island, at 3 p.m.; St. Paul's United Church, Grande Prairie, at 7:30 p.m.

Rev. Mr. Kitchen's career:

He was born in Cornwall, England, and came to Canada in an early age, and became a minister of the former Methodist Church. His college course was interrupted by the war, and he served in France with the Canadian troops. Completing his theological course, he volunteered for the overseas work of the Church. Was appointed to west China in 1920 and worked in connection with the Literature Department of the United Church mission.

He has watched from the inside the development of modern China, from the period of almost chaos following the downfall of the Manchus and the establishment of the republic, through the days of the warlord, degenerate selfish war lords, endeavored to establish a feudal system, centered in the control of certain areas, and with a form of Communism swept down to the present time, when, following a呈现 of a spirit of nationalism, rid itself of reactionaries elements and established a strong central government.

He has experienced some of the joys and sorrows of war, having been through a number of its battles.

But he has seen the wonderful sense of unity achieved in recent years and has experienced the benefit which have come from the many reforms introduced and pushed forward by Chiang Kai-shek.

He has met a number of China's leading men and women, including the Generalissimo and Madame Chiang Kai-shek.

BANK OF MONTREAL CROP REPORT, No. 2

MONTREAL, June 2.—The following is the second Crop Report of the Bank of Montreal:

General

The favorable growing conditions with which the season began throughout the Dominion have continued, such staples as wheat and barley being in good condition in their natural habitat.

In the Prairies wheat production is progressing well and barley, though it has been through a number of severe trials, is making satisfactory progress.

Barley is making rapid headway in southern Saskatchewan and southern Alberta, while some soil drifting has not been of a serious nature. In some sections some damage is done by wireworms; grasshoppers are prevalent in some sections, causing considerable damage to wheat and barley.

The total acreage seeded in the Prairies this year will be somewhat less than in 1937.

Quebec province is showing a great deal of promise, with precipitation heavier in southern Saskatchewan and southern Alberta, while some soil drifting has not been of a serious nature. In some sections some damage is done by wireworms; grasshoppers are prevalent in some sections, causing considerable damage to wheat and barley.

In Ontario grain crops are in healthy condition and meadows show luxuriant growth, but in some sections there is some damage to fruit, tobacco and garden plants.

In the Maritime Provinces pasture, while not over abundant, is in good condition and seedling and planting are well under way.

British Columbia seeding has been completed earlier than usual and all crops are making rapid headway.

Wheat seeding is nearly finished and that of coarse grains well advanced. Late seeding has been partially compensated for by good weather and early sowing.

Wheat is well above ground. Rain is required in the Edmonton area and in the north. Other areas have sufficient moisture, but in some sections more rain is required.

There has been no damage except slight soil drifting in Peace River District. Pasture is in good condition and grasshoppers are satisfactory.

Alberta

Wheat seeding is practically completed and that of coarse grains well advanced. Late seeding has been partially compensated for by good weather and early sowing.

Wheat is well above ground. Rain is required in the Edmonton area and in the north. Other areas have sufficient moisture, but in some sections more rain is required.

There has been no damage except slight soil drifting in Peace River District. Pasture is in good condition and grasshoppers are satisfactory.

Manitoba

Seeding operations are virtually completed. Early sown fields of wheat, barley, oats and rye are in good condition and growth in all cases is reported to be even. Except in a few districts, rainfall has been adequate.

Wheat is well above ground. Rain is required in the Edmonton area and in the north. Other areas have sufficient moisture, but in some sections more rain is required.

There has been no damage except slight soil drifting in Peace River District. Pasture is in good condition and grasshoppers are satisfactory.

Eastern Townships

Eastern Townships are in good condition and growth in all cases is reported to be even. Except in a few districts, rainfall has been adequate.

Wheat is well above ground. Rain is required in the Edmonton area and in the north. Other areas have sufficient moisture, but in some sections more rain is required.

Alberta

Wheat is well above ground. Rain is required in the Edmonton area and in the north. Other areas have sufficient moisture, but in some sections more rain is required.

Manitoba

Wheat is well above ground. Rain is required in the Edmonton area and in the north. Other areas have sufficient moisture, but in some sections more rain is required.

Alberta

Wheat is well above ground. Rain is required in the Edmonton area and in the north. Other areas have sufficient moisture, but in some sections more rain is required.

POLITICAL LEADERS IN SASKATCHEWAN IN HOT GENERAL ELECTION BATTLE

The Saskatchewan provincial election will be held on Wednesday, June 8, and all parties are campaigning throughout the province. The Liberal government, now under the leadership of Premier W. J. Parton (lower left), polled 104,562 votes and elected five members, and the Conservatives polled 114,973, but failed to elect any members. Lower left is J. G. Diefenbaker, K.C., of Prince Albert, who will lead the Conservative Party, while at the lower right is G. H. Williams, who will lead the C.C.F. Party. The Social Credit Party has also entered the Saskatchewan political field for the first time as a party and will contest the election.

THESE SOUTHERN BELLES LED THE FIELD AT LOUISIANA UNIVERSITY

When it comes to comely co-eds Louisiana State University needn't take a back seat to any school. Students there showed their ability to pick the winners when they selected Burns Dean Coaker, right, 20-year-old blonde from Houston, as their most beautiful student, and gave second honors to blond Florence Morley, left.

BEAUTIFUL OLD MANOR BECOMES NEW BRITISH STAFF COLLEGE

Minley Manor, which has just been acquired by the British War Office and will be used as a Senior Wing of the Staff College. It was built about 100 years ago and was purchased with the estate of about 2,500 acres.

BRITISH TEAMS BATTLE FOR RUGBY CUP
Salford defeated Barrow this year in the English Rugby League Cup Final and in the picture above Don Bradman, famous Australian cricket captain, is presenting the coveted trophy to Bismarck, the Salford captain.CALLS ELECTION
Premier Eamon de Valera of Ireland is shown sporting sunglasses in Irish political circles when he asked for dissolution of parliament and the general election on June 17. This is the second election within ten months, and as Premier de Valera has a very slim majority in the House his swift decision is considered good politics. The election is likely following more closely on the recently completed Anglo-Eire pact.

THE ROWELL COMMISSION CONSIDERS THE NEW BRUNSWICK BRIEF

This photograph, taken when the Rowell Commission (left) presented its report to consider the New Brunswick brief, shows Dr. Joseph Sirrola, acting chairman in the absence of Hon. Newton W. Rowell, at the right of the picture. With him are J. W. Dafoe, LL.D., Winnipeg; Dr. R. A. Mackay, Halifax; Prof. H. F. Angus, Vancouver; J. McGregor Stewart, K.C., counsel for the commission; and Messrs. Fowler and Eggleston, of the secretarial staff of the commission. Seated from right to left are: James H. Conlon, director of the New Brunswick Department of Education Federal and Municipal Relations; Hon. W. S. Anderson, chairman of the New Brunswick Electric Power Commission; Hon. P. L. Morris, Minister of Education; Hon. J. B. McNaughton, K.C., Attorney-General; Hon. A. A. Dysart, K.C., Prime Minister and Minister of Public Works; Hon. J. B. McNair, K.C., Attorney-General; Hon. A. C. Taylor, Minister of Agriculture; Hon. F. W. Pirie, Minister of Lands and Forests and Mines; Hessers, Savard and Skelton of the secretarial staff. The photograph was taken in the assembly chamber of the Legislative Building.

ANCIENT SOCIETY CELEBRATES CORONATION ANNIVERSARY

To celebrate the anniversary of the Coronation, one of the most remarkable peals of bells in the British Empire was rung from the belfry of the Imperial Institute, London, by the Ancient Society of College Youths. This photograph shows the ringers during the celebration.

Mrs. R. Foster (née Gossart) and Mr. and Mrs. D. Carlisle were the dinner guests of Mr. and Mrs. H. and Master Val Newton on Tuesday evening.

Mrs. Rex Harper spent last week-end with Mrs. Archer of Beaver Lodge.

The cabin committee of the Girls' Camp Association met the Parks Board on Saturday at Lake Saskatoon to discuss the placing of their six cabins at the lake.

The Musical Club held its last meeting of the season at the home of Mrs. Caldwell last Thursday afternoon, while Mrs. Fawkes read a very interesting account of the musical plans and the guests played Russian or Hungarian music.

The Senior C.W.L. is holding a special meeting in St. Joseph's rectory this evening.

Mrs. Jack Fitzpatrick entertained some of Loreen's girl friends at the tea hour on Sunday.

The Clairmont Ladies' Aid will hold their missionary meeting at the home of Mrs. J. W. Callister, on Thursday, June 16, at 3 p.m.

Mrs. Bert Summer and baby of Beaver Lodge passed through Grande Prairie on Monday on her way to spend a couple of months with her parents.

Mrs. Carl served at a bridge dinner on Tuesday evening in honour of Mrs. Raynor, who expects to leave soon for St. Paul, Alberta.

The Girls' Work Board met on Monday afternoon at the home of Mrs. T. W. Lawlor, when after a brief meeting and refreshments the girls, who are providing for the camp, Mrs. Dave Poplin gave a most interesting paper on camping.

After the Senior C.W.L. meeting, held at the home of Mrs. J. Fitzpatrick on Wednesday evening, Mrs. McGuire gave a contribution from the Marquis Merry Del Val, G.C.O.O., one of Europe's senior

and most distinguished diplomats for the past twenty years. In this communication, printed in "The Catholic Herald," he describes the new wave of terrorism sweeping Red Spain, of atrocities on defenseless citizens. The hostesses served a delicious demonstration luncheon of ten different kinds of soups, casseroles, and meat loaf, all containing puffed wheat.

Mrs. and Mrs. Mackintosh and baby daughter left on Wednesday to make their home in Edmonton.

Mrs. J. Evans had as her guests during the month of May her mother, Mrs. C. E. Fawkes, her sister-in-law, J. V. Forrest, and the latter's little daughter, Gail, all of Winnipeg. The visitors left for their home on Friday's train.

The Deanery of the W.A. met at Spirit River on Saturday. Mrs. A. L. Wold, treasurer, was present and addressed the meeting. A business session was held, at which Mrs. McNaughton of Appleton was elected president.

The teachers of the Grande Prairie Inspectorate held a picnic at SASKATOON Islands on Saturday. The stormy weather caused some difficulty in distance attending, but a good time was enjoyed by those who were able to be present. Softball and other games were played and delicious lunches were served throughout the day.

Mrs. and Mrs. Harold Keller, who have been living in Detroit for the past two years with Mr. Keller's relatives, returned to Grande Prairie by car yesterday. They and their two sons are staying with Mrs. Keller's parents, Mr. and Mrs. Roy Mitchell.

High School crests and pennants were used to carry out the colors of the Grande Prairie High School—purple and gold. When Miss Dorothy Palmer, a local historian, entered a happy dinner party at the Palace Cafe on Friday night for the graduating class of the school, she was presented with a crest and a purple ribbon.

Mr. and Mrs. F. S. Fairbairn of Fairview and Mr. and Mrs. I. Phelps of Bluesky were visitors in Grande Prairie on Tuesday and Wednesday.

Mr. and Mrs. Marleff and Miss Jamie McKeeman motored to the McLeans' home at Buffalo Lakes on Sunday.

At Mrs. J. B. Yule's home on Wednesday afternoon, June 2, there was a happy little birthday surprise party. Several friends came and with them brought a delicious birthday cake, sandwiches, and punch. In spite of the heavy wind-storm, Mrs. Yule had a very happy birthday.

SURPRISE SHOWER FOR MRS. FOSTER

Mrs. David Carlisle and Mrs. O. Falconer were joint hostesses at a surprise shower given at the home of Mrs. A. M. Carlisle on Thursday evening. The bridegroom, Mr. Reginald J. Foster (neé Beverly Bass), a bride, a brother of Foster.

Twenty guests awaited the bride, who came to the shower in a canary pink of yellow and white streamers, hung from the centre of the living room. At the end of each streamer was a small bouquet of flowers which opened, revealed many beautiful and useful gifts accompanied by cordial verses and good advice. An enjoyable evening was spent in games and contests.

The tea tables were laid with a lace cloth, and a pink brides cake, with an arch on top, under which stood a miniature bride and groom. White wed-

ding bells and pink flowers completed the decorations.

Miss Palmer and Mrs. Mensinger, sister of the bride, poured tea, assisted by Phyllis Mensinger and Valerie Ellwood. A delicious luncheon was served.

SIX KINDS OF MEN

There are six kinds of men that there is without exception:

He that cannot forget his trouble.

An envious man dwelling with fits newly enriched.

He that dwelleth in the place and cannot thrive where another thrives before him.

A rich man decayed and fallen into.

He that would obtain that which he may not get.

He that dwelleth with a wise man and can learn nothing from him.

—Hermes.

TO THE BOYS

Of course what we have the right to do is to do certain things, but we shall turn out to be a good man.

Now, the chances are strong that he won't be a good man, unless he has a good deal of bad in him.

He must not be a coward or a weakling, a bully, a shark, or a prig. He must work hard and play hard, must be clean-minded and clean-lived, and able to hold his own under all circumstances and against all comers. —Theodore Roosevelt.

HOW LONG

A grindstone that has no grit—how long would it take to sharpen an ax? And that had not got in with the rest of the world that would take to make a man?

—Henry Ward Beecher.

HOW TO CURE WHOOPING COUGH

Find a donkey. Cut some of the hair off of the cross on its back—chop it up and eat it in bread and butter.

HAVE YOU ANY WARTS?

Do one of these things:

Rub the wart with a live snail and then impale the unfortunate mollusc.

Steal a piece of bacon, loosen the bark of an ash tree and push the bacon into the hole so that it will come out in winter and your warts will vanish (maybe, perhaps!).

Get a bag, put it into a stone, and throw the bag into the road. Someone is sure to pick it up to see what is inside, and then, hey presto!—he has a wart.

Now, folks, I'm not spoofing, these are honest-to-goodness recipes from Cheshire—but not of this century, that's goodness!

MAKE ALLOWANCES

(By Peter Woods)

A recent film brought back into the minds of many people the pathos of the Captain's widow. It was because although the Captain's honor was eventually vindicated, it is a sad thing even at this distance to realize how much he vanished years when he was under the cloud.

To be tried and judged and condemned for something of which one is entirely innocent—an ordeal can only a man of sterling courage and integrity can preserve, a high character unmarred by a sense of cruel injustice.

Such a glaring instance of a miscarriage of justice does not often happen, but there are minor injustices in which many of us unwittingly participate.

How easy it is to think of a man or woman guilty of some social or moral offense. One's heart is led to believe that "he is that." Yet there is rarely the whole truth about anyone, our summary verdict is not just.

I am inclined to feel that the other day, for instance, about one known to us both who had gone off the rails to seek a better life. We were perfectly amazed to hear the harsh words people were saying about him, for we knew the man's better side.

A tea table was laid with a lace cloth, and a pink brides cake, with an arch on top, under which stood a miniature bride and groom. White wed-

ding bells and pink flowers completed the decorations.

—The Tribune

CARD OF THANKS

The Social Credit Group will meet Thursday evenings at 8 p.m., instead of Friday, in the club room over Kenny's store.

LA GLACE SPORTS JUNE 22

The La Glace sports will be held on Wednesday, June 22. There will be full line of athletic events, including baseball. The rodeo will be a big attraction, with its bucking horses, wild horse roping, etc. And, of course, a dance in the evening will round out the day.

8:00 p.m.—Lutheran Church.

LUTHERAN BIBLE CAMP

GRAND CANYON, June 12

July 18-24

Classes in the Forenoon—Services Every Evening

Registration \$10.00 per person, \$1.00 for four; \$3.50 for five; \$4.00 for six.

If possible, register in advance by writing to Miss Emily Evenson, Secretary, or appendants on Friday last.

He is reported doing well, and a speedy recovery is indicated. We look forward to seeing him able to stand in his old style soon.

Miss Ada Fletcher returned on Tuesday from Edmonton, after completing her normal school course there.

The regular meeting of the members of Women's Circle will be held at the home of Mrs. Fletcher on June 15.

Travellers to Edmonton this week will call Campbell and Norman Leslie. Campbell will hold for a few days, and Mr. Campbell, who has been out for a longer visit, will return with him. Mr. Leslie is attending a Masonic convention there.

A general meeting of the members of the Legion Club will be held at Dimsdale Hall on Friday, June 10, to make plans for a picnic.

On Monday, Mrs. Livingston, who has been visiting her parents, Mr. and Mrs. E. B. Brown, leaves for her home at Portland, Oregon.

LA GLACE NEWS

THANKS

LA GLACE, June 6.—Mr. Olaf Larson, who died May 24, was a member of the local lodge of the Order of Sons of Norway, and being that he had many of his immediate brothers who undertook to give out late member's certificate, this was succeeded by his wife, Mrs. Larson, who is now a widow.

Food donations are necessary in order to meet the registration fee at this low figure.

LUTHER LEAGUE CONVENTION

The last two days of June.

Visitors from all over the country.

This camp is sponsored by the Peace River Circuit Luther League.

WITTY PARS—MORE OR LESS

"What made me a nudist?" asks a reader. But we thought nudists were born, not made.

"I have a little voice in furnishing the home, and the house alone and be sure deaf it sleeps soundly." Will she return, she suspends the child.

"The skin is tilted so that a single drop of water falls on the baby's forehead every few seconds."

"Lullabies aren't in it."

"The method of a world-famous Chinese torture victim is to bind the victim's hands behind his back and then pull him apart hour after hour, until he is driven mad."

"Out in the East, when a man is driven mad, he is forced to drink a mixture of human blood and urine."

"The secret of smashing swords is to use a nail to bind the hilt."

"The secret of the Chinese torturer is to make the victim drink his own urine."

"What could be more awe-inspiring than being up 5,000 feet in an airplane for the first time?" asks Wop May.

"Being up 5,000 feet without

anyone around is like being in a dream."
